

ABHISHEK PRAJAPATI

Full-Stack Developer | Backend Development & Workflow Automation

Greater Noida, India | abhi.prajapati2005@gmail.com | +91-8887878170 | [LinkedIn](#) | [GitHub](#)

PROFESSIONAL SUMMARY

Final-year Computer Science student and full-stack developer who enjoys turning manual workflows into dependable web applications. I have built and deployed role-based platforms using React, Node.js, PHP, SQL, MongoDB, and PostgreSQL, with hands-on work in authentication, real-time features, testing, automation, and SEO. I recently completed a paid web development internship where I delivered and managed a production website for an engineering company.

TECHNICAL SKILLS

- **Databases & SQL:** MySQL, PostgreSQL, MongoDB, relational schema design, SQL queries, transactions, Drizzle ORM
- **Frontend Development:** JavaScript, TypeScript, React, Next.js, Angular, HTML5, CSS3, Tailwind CSS, responsive design, SEO
- **Backend Development:** Node.js, Express.js, Spring Boot, PHP, REST APIs, Socket.IO, authentication and role-based access
- **Programming Languages:** JavaScript, TypeScript, Python, Java, PHP, C/C++
- **Developer Tools & Cloud:** Git, GitHub Actions, Docker, Postman, AWS, Cloudinary, Netlify, Vercel, Render, Figma, VS Code

EXPERIENCE

Web Developer Intern - Cawnpore Engineering Services | *React.js · JavaScript · SEO* *Jun - Jul 2026*

- Developed and launched the company's website for its HVAC design, installation, commissioning, maintenance, and system-upgrade services across India.
- Created responsive pages for services, industries, completed projects, and the company's engineering approach, keeping the experience clear and accessible across devices.
- Handled on-page SEO, deployment updates, and ongoing website management during the two-month paid internship.

EDUCATION

Gautam Buddha University

Bachelor of Technology - Computer Science and Engineering

Greater Noida, India

2023 - 2027 (Expected)

- CGPA: 7.94
- Relevant Coursework: Data Structures, Algorithms, Operating Systems, Networking, and Databases

PROJECTS

Auto-Examination Management System | *PHP · MySQL · JavaScript · XAMPP* *Mar 2026*

- Built a web platform that brings exam scheduling, seat allocation, invigilation, attendance, and reporting into one role-based workflow for Admin, Exam Cell, and Faculty users.
- Designed multi-branch seating allocation with manual adjustments, validated CSV imports, and a normalized MySQL schema with transaction-safe operations and report exports.
- **GitHub:** <https://github.com/unseenap/Auto-Exam-Main>

Bodhi-Mitra - Real-Time Mental Health Support Platform | *React 19 · Node.js · Socket.IO · MongoDB* *Aug 2025*

- Developed a real-time platform that connects students with psychologists through emergency matching, live sessions, notifications, and role-specific dashboards.
- Implemented OTP-verified authentication, JWT-based access control, crisis-keyword detection, and property-based tests for authentication, chat ordering, and emergency-state transitions.
- **GitHub:** <https://github.com/unseenap/Bodhi-Mitra> | **Live:** <https://bodhimitra.netlify.app/>

CredX - Explainable Job & Internship Matching Platform | *Next.js 16 · TypeScript · MongoDB · Groq AI* **Jul 2026**

- Created a student and recruiter workspace that ranks opportunities using skills, GPA, and work-authorization signals, while showing how each factor contributes to the 0-100 match score.
- Added resume processing for PDF, DOCX, and image files along with application tracking and recruiter-management workflows.
- **GitHub:** <https://github.com/unseenap/CredX-SmartJobMatchingDash-master> | **Live:** <https://cred-x-smart-job-matching-dash.vercel.app/>

CarouselQueue - Instagram Carousel Publishing Automation | *Python 3.12 · Instagram Graph API · Cloudinary · GitHub Actions* **Sep 2026**

- Built an automation pipeline that reads from two content queues, validates the required images, assembles four-slide carousels, uploads media, and publishes scheduled posts through the Instagram API.
- Added dry-run previews, automated tests, alternating queue selection, duplicate-post prevention, and local publishing-state tracking without storing credentials in the repository.
- **GitHub:** <https://github.com/unseenap/CarouselQueue>

Intelligent Land Record Digitization and Validation | *Next.js · TypeScript · PostgreSQL · Drizzle · Zod* **Sep 2026**

- Worked on a role-scoped document workflow that keeps source files, OCR evidence, corrections, approvals, and audit history connected throughout the land-record digitization process.
- Implemented validation, duplicate review, durable processing jobs, immutable approval snapshots, scoped search, and human-verification boundaries; live OCR and government integrations remain separate deployment work.
- **GitHub:** https://github.com/unseenap/Land_dizitization

ACHIEVEMENTS & CERTIFICATIONS

- 1st Prize, AI Innovation Hackathon 2026
- Finalist, India Innovates 2026
- Completed Web Development Certification - Certificate No: UC-9e4a3cde-a9b9-4d28-8f74-45694ef5fceb
- **Certificate URL:** <https://ude.my/UC-9e4a3cde-a9b9-4d28-8f74-45694ef5fceb>
