PROFESSIONAL SUMMARY

Computer Science undergraduate and full-stack developer with hands-on experience designing relational databases, writing SQL queries, and building interactive, role-based web platforms using JavaScript, REST APIs, and the MERN/PHP-MySQL stacks. Comfortable working across the full stack, from schema design and query-driven backend logic to dynamic, real-time front-end interfaces, and quick to pick up new development platforms and tools in fast-paced, enterprise settings.

TECHNICAL SKILLS

- **Databases & SQL:** MySQL, MongoDB, Relational Schema Design, SQL Query Writing & Optimization, Transaction-Safe Operations
- **Web UI Development:** JavaScript (dynamic UI, real-time updates without page reload), HTML5, CSS3, Responsive Design, REST API Integration
- **Programming Languages:** JavaScript, TypeScript, Python, Java, C/C++, PHP
- **Frameworks & Cloud:** Node.js, Express.js, React, Next.js, AWS, Netlify, Vercel, Render
- **Developer Tools:** Git, GitHub, Postman, Figma, Visual Studio Code

EDUCATION

Gautam Buddha University

Bachelor of Technology – Computer Science and Engineering

Greater Noida, India

2023 – 2027 (Expected)

- CGPA: 7.94
- Relevant Coursework: Data Structures, Algorithms, Operating Systems, Networking, Databases

PROJECTS

Auto-Examination Management System | PHP · MySQL · JavaScript · XAMPP

March, 2026

- Built a web application to automate exam scheduling, seat allocation, invigilation, and attendance tracking.
- Built an interactive, JavaScript-driven grid-based seating UI with multi-branch interleaved allocation and real-time manual seat adjustments, with dynamic dropdowns and validation alerts.
- Designed role-based access (Admin, Exam Cell, Faculty) with REST APIs and bulk CSV student upload.
- Designed and queried a normalized MySQL database with 12+ tables, writing transaction-safe SQL procedures and stored logic for allocation and Excel report export.

Bodhi-Mitra – Real-Time Mental Health Support Platform | Node.js · Express · React 19 · Socket.io · MongoDB

August, 2025

- Built a real-time mental health platform connecting students with psychologists via live chat for instant emergency matching and session management.
- Implemented JWT authentication with OTP email verification, role-based access control (Student/Psychologist/Admin), and 20+ REST API endpoints.
- Developed three role-specific dashboards with crisis keyword detection, session rating, and real-time notifications.
- Wrote property-based tests covering JWT auth, RBAC, chat ordering, and emergency status transitions.
- **GitHub:** <https://github.com/unseenap/Bodhi-Mitra>

DispatchHub – Ride-Dispatch & Trip Operations Platform | Angular 20 · Spring Boot · Java 21 · PostgreSQL · Docker

- Built a full-stack dispatch platform with separate rider, driver, and administrator experiences, including trip lifecycle management, driver matching, and fare estimation.
- Designed a PostgreSQL relational schema and JWT-secured, role-based workflows for riders, drivers, and admins, with an analytics dashboard for operations.

- Containerized the Angular, Spring Boot, and PostgreSQL stack with Docker Compose for consistent local and deployed environments.
- **GitHub:** https://github.com/unseenap/ride_dispatch-1

CredX – Explainable Job & Internship Matching Platform | *Next.js 16 · React 19 · TypeScript · MongoDB · Groq AI*

- Built a platform that ranks job and internship opportunities using skills, GPA, and work-authorization signals, with a transparent 0-100 match score and visible reasoning.
- Implemented resume intelligence for PDF, DOCX, and image uploads, and a student application tracker with a recruiter management workspace.
